

FIRE BASKET

IRON CAST, 1960 - 1965

These andirons or firedogs were conceived like a basket or a grid in cast iron. They were designed for Wabbes' new house after his wedding in 1960. Indeed, the chimneys of his modern house were rather smaller than the atraditional ones. Jules Wabbes needed to create something new to take advantage of the fireplace.

These andirons are very efficient for cradling the logs and allow air to circulate. Enjoy a nice, warm wood fire at home again, in a safe way as the logs will securely and slowly burn.

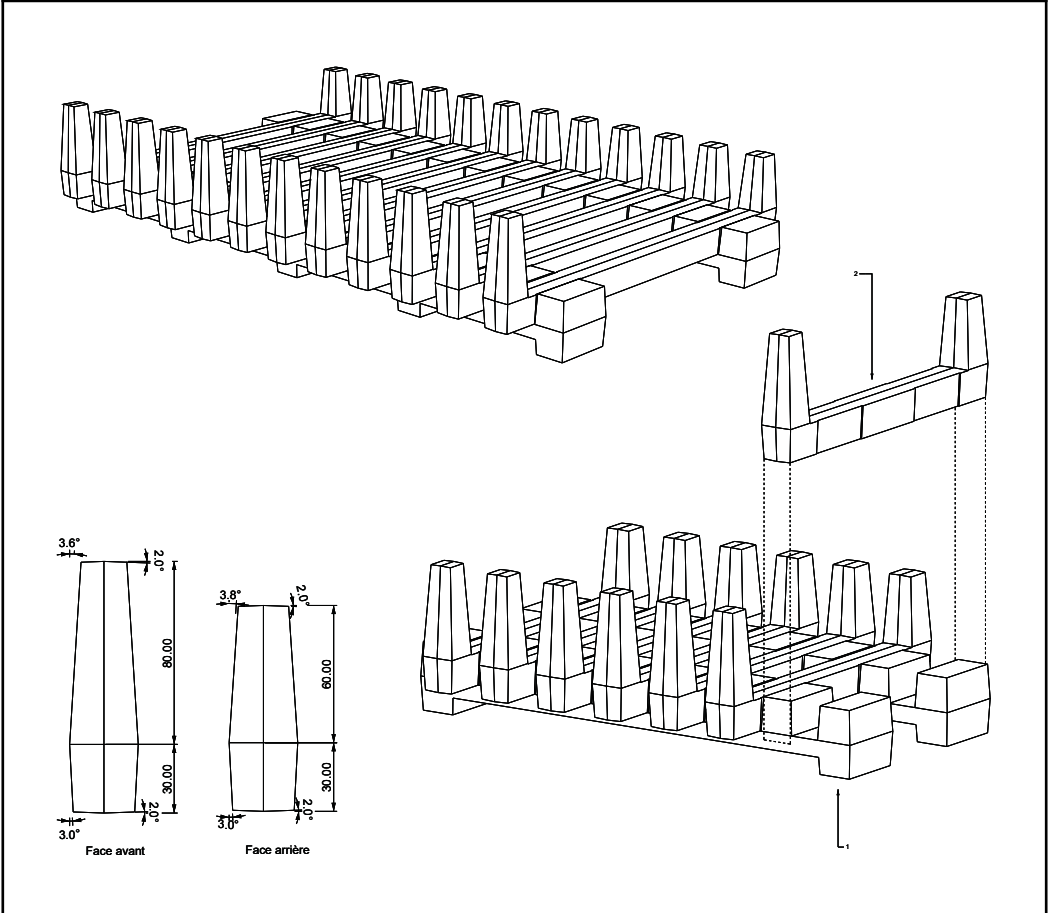

You will keep them forever. No maintenance required.
Natural patina. Available in two sizes
